Defy the Elements with Crypton In & Out Fabric

Beautifully designed for extreme durability and exceptional colorfast performance, Crypton In & Out interior/exterior fabrics are designed to withstand even the greatest challenges of man and nature. Crypton's integrated moisture barrier keeps the outdoors from penetrating the fabric and reaching the cushion inside.

Like all Crypton Fabric, In & Out is engineered with Crypton's patented stain, liquid, bacteria, mold, mildew and odor resistance integrated into every high-UV fiber. Impervious to everything from rain, sun and cold to dirt, kids and bleach, In & Out incorporates high-UV fibers and Crypton's reformulated chemistry and processing techniques for superior outdoor performance. Crypton In & Out provides performance and durability without sacrificing the beauty.

Originally developed with the hospitality market in mind, Crypton In & Out offers superior UV protection. "Developing In & Out was not an easy task," says Craig Rubin, co-founder of Crypton. "In order for any fabric to be Crypton, it has to meet our high standards: it must be extremely strong, have high abrasion, not pill or tear, and be easy to clean. Adding colorfastness and guaranteed bleach cleanability was a bit of a challenge, but one that with time, trial, and testing, we were obviously able to overcome."

Since its launch in 2006, many leading outdoor furniture manufacturers and retailers have singled out Crypton In & Out as a preferred weatherproof fabric for use on frames and cushions. In & Out is currently available in a wide array of patterns and colorways through Woodard Furniture and at more than hundreds of retailers, including Carl's Patio; Robb & Stucky; and Frontgate, the well-known online resource.

Crypton Super Fabrics guarantee the greenest, cleanest approach to performance fabrics in the market today. Using its patented technology for 15 years in the world of contract, healthcare and hospitality upholstery design, the incredibly durable and cleanable Crypton permanently stands up to moisture, stains, odors and bacteria. Crypton's mess-free, stress-free fabric makes its way into the consumer market in 2008. With a growing collection of new and innovative products, Crypton Super Fabrics empower everyone with the freedom to Live Clean. For more information, visit www.cryptonfabric.com.
